Club Correspondence
All correspondence to the Golden Gate Live Steamers should be sent to the secretary, Rich Croll at his email railroc66@yahoo.com

CallBoy
Articles, pictures, photographs, items for sale or any other information that would be of interest to the club should be sent to Pat Young, the interim CallBoy editor at phty95014@yahoo.com

Deadline for submittal to next month's issue is the 19th!

Calendar of Club Sponsored Events
(Until further notice, the 2020 Calendar is no longer valid)

07/12/20 General Monthly Meeting/Board Meeting
08/09/20 General Monthly Meeting/Board Meeting
09/13/20 General Monthly Meeting/Board Meeting
10/03/20 GGLS Fall Meet
10/04/20 GGLS Fall Meet and Open House
10/11/20 General Monthly Meeting/Board Meeting
10/24/20 PV&A & GGLS Joint Meet at PV&A
11/08/20 General Monthly Meeting/Board Meeting
12/13/20 General Monthly Meeting/Annual Meeting/Board Meeting

GGLS Trust Fund Members
John Lisherness
Jerry Kimberlin (elected March 2015)
Ken Blonski (elected December 2019)

GGLS Committee Chair people
Bits & Pieces: Sheldon Yee
Boiler Testing: Jerry Kimberlin
Building: Rick Reaves
CallBoy Editors: Pat Young
Engine: Mark Johnson
Grounds: Andy Weber
High Track: Sheldon Yee
Librarian: Pat Young
Membership: Sammy Tamez
Public Train: Walt Oellerich
Refreshments: Walt Oellerich, Sheldon Yee
Rolling Stock: Rich Croll
Round House: Michael Smith
Security: Jon Sargent
Signals: (To Be Determined)
Technical Talks: Charlie Reiter
Track: John Lytle
Web Site: Pat Young

Membership
To qualify for membership, attend 2 monthly meetings. At the first meeting, please introduce yourself and obtain a membership application from Membership chairman or Secretary. At the second meeting, return your completed application, the yearly prorated club dues, together with a the $25 initiation fee and you are officially a member.
Announcements

General Meeting Announcement
04/18/2020

Due to the COVID-19 outbreak and mandates from Federal, State & County, the Golden Gate Live Steamer facility is closed until further notice for club meetings, gathering by members and Public Train operations.

The shelter-in-place requirement has also shut down the preparation & delivery of the printed CallBoy. The online version will still be delivered and it is encouraged that those who are reliant on the printed version obtained a printed version of the online Callboy from other members.

We are saddened by this state of affairs but hope to resume when the mandates put in place by the authorities are lifted. We hope you will bear with us during this stressful time and June all of you be safe.

GGLS Spring Meet Canceled

Due to the COVID-19 outbreak & the shelter-in-place mandated by the State of California, the Golden Gate Live Steamers Board has canceled the Spring Meet that was originally scheduled in June. Thank you for your patience and please stay safe.

Minutes of General Meeting

No general meeting was held due to the COVID-19 sheltered-in-place.

Minutes of the Board Meeting

No Board meeting was held due to the COVID-19 sheltered-in-place.

Bits and Pieces

No Bits and Pieces was held due to the COVID-19 sheltered-in-place.

GGLS Signal Report
Submitted by John Davis

Part of the normal Thursday Signal Crew routine is to walk the track checking the signals & switches for problems. Here are the issues found during the last month and actions taken.

Signal bridge before switch T33 (in front of the Shattock Barn) was showing no lights on the main
line, indicating a rail continuity fault. The common rail beyond the switch had a bad jumper and was repaired.

Wire nut connections in controller for T33/T05 that were not reliable were soldered.

There was a broken tie at the T51 switch which was the support for the switch actuator. That tie was replaced by Richard Croll. The switch actuator linkage was adjusted and proper switch/signal operation was confirmed.

There were no signal lights at S9 (outer loop just beyond the bay view and around MP28). Normally this would indicate a faulty rail connection. After investigation, there was a bad solder joint on the cathode side of the green LED on S9. The solder joint was repaired and signals confirmed.

Exercised bi-stable relay on T26 (adjacent to Dameron Shed) for proper turn-out operation.

The inside loop switch T30 actuator was not working properly. The actuator was removed and disassembled. The over-center spring tension was increased, mechanics cleaned and oiled. Actuator reinstalled and aspect switches adjusted. Proper operation of the switch and signals were confirmed.

There was a red occupancy signal for the outside loop on the signal bridge before T43 (near the public station) when there was no train in any block. A bad jumper was found on the common rail. When the faulty jumper was repaired, the signals worked. This doesn't explain the red signal, so further study is being done to find an explanation for the red signal (maybe electrical leakage to adjacent rail blocks). But for now, this signal is working properly.

All work not otherwise noted was done by John Davis and Bruce Anderson.

Possible future signal projects: 1) Replace slow actuator at T51 with new fast acting actuator. 2) Replace slow actuator at T43 with new fast acting actuator. 3) Add Emergency Stop signals at T05 in front of the Shatlock Barn. 4) Add Emergency Stop signals at T44 crossover in front of the public station. 5) Add fast acting actuator to T52 with switch control around MP24. 6) Add fast acting switch actuator to the new switch on the inside track in front of the round house with controls on both sides of the switch. This is a long list, subject to change, and it will take time. If you have comments or suggestions, send them to John Davis, 48jrd@sbcglobal.net.
Great Northern Caboose
by Rich Croll

Here are some pictures of the Great Northern caboose I am building. This is sort of a virtual Bits and Pieces article.

This photograph shows the marker lights turned on. I put LED's into them, and I may do a write up later about how I did it.

A look inside the caboose's cupola detailed interior.
The stove shown above is actually an ash tray. They can sometimes be found on Ebay if you need to have one.

Shatlock Barn Turnout Replacement Project
by Rich Croll

The old turnout has been removed and grading done for the new ties. Note the length of the new turnout on top of the mainline. This is all one unit!
Looking down from the Shattock Barn, the new ties are put in place and the straight stock rail is screwed down.

This photo shows the complexity of the 3-way switch.

**Hopper Car Project**

As if Rich Croll didn’t have enough to do, he has started on building a 1/8” scale hopper car. The photo shows the side and end for a USRA hopper car. These were designed during World War I and many more were built later. They were very typical coal cars for eastern railroads but Rich's hopper car will carry the propane tank for his steamers.

All rails back in place for tracks 1 to 3.
GGLS Life In A Covid-19 World
By Bruce Anderson

Aah…, life before Covid-19 virus. Alas, in the good old days I’d be preparing coffee and a warm fire for the Thursday crew.

Now days I start by wiping down surfaces of our club house with disinfectants instead of preparing coffee and picking up donuts. One good thing from this has been that I really don’t need the donuts.

One very fortunate thing from this has been the return of John and Shanna from Arizona. Although I haven’t seen Shanna’s smile yet, I understand she is doing well. It is GREAT to have John back in the neighborhood! In this photo, John and myself are masked and gloved up for close proximity work on a signal control box. Many thanks to Jo Ann Miller for taking the photo!

Here Richard Croll & Walt Oellerich are practicing social distancing during their work at the track.

In this photo, Jo Ann Miller is masked up to prune a tree adjacent to the Shattock Barn. In this case her mask is more to avoid pollen & dust rather than Covid-19 particles. Many thanks for all your contributions, Jo Ann!

This is what the hillside behind the Shattock Barn looks like now. Although the brush Jo Ann was working on appeared green, there was a fair amount of it that was dead, it was also too close to the Shattock Barn. I weed whacked the hillside removing potential fuel as the hillside dries out.
Of course Mel McDonough is in a state of nirvana as he merrily goes after his pile of timber creating firewood to keep us warm on winter days. In places where social distancing is not an issue, we don’t mask up.

Finally, around Christmas I ordered a Keim Steam Pump for my Climax. In the "learning from purchasing a locomotive department," the Climax worked well on compressed air but none of the three ways to get water into a hot boiler worked!

I first fixed the hand pump by moving a check valve that had improperly been located. Secondly I replaced a non-functional steam injector. Thirdly, Roy Motz and I had been working on fixing/replacing the steam pump up until Roy passed away. Alas.

Around Christmas I ordered a new Keim Pump that arrived as the Covid shelter in place was beginning. I decided to just bring the Climax home and install it here. With that done now, I’ll probably work on a couple of other tweaks before returning it to Tilden.

Man am I looking forward to the day when we can once again see smiles on kids, parents, grandparents, and club members! Hopefully in this case the light at the end of the tunnel won’t be an oncoming train! Someday! :-)

Here, Bill Smith is seen entertaining families with Thomas, Annie & Clarabel.

To Infinity & Beyond!
Because of Shelter-In-Place restrictions on travel, many members are missing the opportunity to see some of the pretty plants in bloom right now at the club facility. Here are a few photos for your enjoyment.

A field of Forget-Me-Nots on the hillside between GGLS and RVRR on the Heinz Loop.

Solanum Purple Nightshade on the left side of the entrance driveway.

Verbena de la Mina on the left side of the entrance driveway.

The California state poppies are in bloom.

Sticky Monkey on the Clerici Barn lower hill.
Euphorbia oblongata on the right bank as you walk out to Heinz Loop.

There is railroad construction in progress at Soda Springs, California. Here are photos of a new signal bridge at the Soda Springs/Baker Ranch Road crossing.

I don't know where the signal bridge will be located or the reason for the new bridge.

Anyone with further information, please send it to Pat Young. If I discover more info, it will be passed on in a future issue of the CallBoy.

From the Killamarsh Chronic Eyestrain newsletter issue 215 somewhere across the pond, editor Mike Lynskey has a column he named the “warrisit” competition.

With his kind permission, I include this photo. The caption reads “OK, so what is it? You can have a wild guess, or suggest something humorous or enlighten us with your fantastic knowledge. Try me!”

The answer can be found in the next issue of the CallBoy.
For Sale
7.5" Southern Pacific #1829 Train
March 16, 2020
Sponsored by Michael & Chris Smith

A complete 7.5" gauge train in 1/8 scale ...

with a 2-6-0 Mogul-type steam locomotive with Vanderbilt tender, ...

boxcar, ...

gondola ...

and caboose.

There are many extras included, so be sure to watch the 10:26 minute YouTube video as there are many details explained throughout at: https://youtu.be/RuOj3HUu3Ml

Asking $22,500.00
SVLS Christopher Donhost

Please call (916) 208-7295 for more information.
**For Sale**

Partially Completed 4-4-0 American

December 3, 2019

Partially completed Little Engines 4-4-0 7.5” gauge American engine & tender for sale. Locomotive has a newly rebuilt chassis & copper boiler, runs nice and has most accessories. As shown the tender has a brass body.

Asking price is $5,500.

If interested or have questions, contact:

Dave Bradas  
Napa, California  
94558

dabradas@yahoo.com  
(707) 252-7390

---

**For Sale**

1” Gauge Racks

April 3, 2019

I have some racks left over from my 1” days which originally fit in a trailer. Powder coated and is actually stackable.

Asking $150.
