

2016 GGLS Fall Meet

The 2016 Fall Meet was held on October 22,23 and GGLS member Steve Vitkovits was kind enough to send in the following photos that he took on Sunday during the Open House for the Public.

The Bay Area Engine Modelers (BAEM) were kind enough to come down and display their fine models at the meet. From left to right, we have Bob Hettinger, Larry Bunch and Paul Denham.

BAEM/GGLS member Paul Denham conversing with BAEM member Larry Bunch, possibly on how one can make this engine power this engine on alternative energy!

BAEM member Bob Hettinger showing off a miniature Hit & Miss. He also brought a single overhead cam 4 cylinder engine.

A table chock full of Paul Denham's creation, some which might be found in the 2016 Spring Meet article down loadable from the gglS.org web page.

BAEM member Dr Bob Kradjian with a small sample of some very wonderful models from his collections.

It wasn't all stationary engine model display. There were some action at the track too:

Here in the steaming bay are some of the locomotives ready to head down the track. Visible from left to right are apparently GGLS members Rick Ratto, Bruce Anderson, maybe Dan Swanson behind him, Jerry Kimberlin and Sheldon Yee.

A very handsome narrow gauge 0-4-0 locomotive own by some lucky individual scaled to run on our 7 1/2" scale track.

BAEM member John Meredith displayed his radial aircraft engines and they are something to see. I hope John and the other BAEM members can one day give a technical talk to share their knowledge and expertise with the rest of us.

GGLS members Dan Swanson and Bob Cohen enjoying the steam/smoke in the steaming bay.

In the foreground is the train of John Smith and just behind that is the GGLS public train's 4-6-0 RGS 20 narrow gauge locomotive.
